

STANDINGS DETERMINATION FOR NTPL CHAMPIONSHIPS

DETERMINING WINNER OF INDIVIDUAL MATCHES:

If both teams have an equal number of team points at the end of all 3 rounds of play, the team with the most games won will be declared the winner.

If both teams have an equal number of games won, the team with the most points scored within each game (such as 11-4) earned will be declared the winner.

If both teams have an equal number of game points won, then the team that won the most number of rounds would win. (There are 3 rounds of play - if one team won 2 rounds and the other team won 1 round, the team who won 2 rounds would win.)

DETERMINING WINNER IN ROUND ROBIN FLIGHTS:

The team with the most team wins is determined to have won the pool play competition.

If two teams have the same win/loss record, the head-to-head winner of their match will be declared the champion.

If more than two teams have the same win-loss record, the team(s) with the fewest total team points will be eliminated until there are two teams remaining. Then the head-to-head tie break criteria would apply to the remaining two teams.

If more than two teams have the same win/loss record, and there is a tie in total team points, the team(s) with the fewest games won will be eliminated (or fewest game points if games won is tied) until there are two teams remaining. Then the head-to-head winner of their match will be declared the champion.
